DETAILED ACTION

Status of Application

The Request filed on January 16, 2003 for Continued Examination (RCE) under 37 CFR 1.114 of Application 09/735,712 is granted. An action on the RCE follows.

Applicants' Amendment

Applicants' amendment in Paper No. 16 filed on January 16, 2003 has been entered in full. Claim 2 has been thrice amended. Claims 1-8 are currently pending and under consideration.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.

Withdrawn Rejections

The rejection of claim 2 under 35 U.S.C. 112, 2nd paragraph, as set forth in the previous Office Action (Paper No. 7 & 10), has been withdrawn in view of applicants' amendment to the claim.

Claim rejection under 35 U.S.C. § 101

The rejection of claims 1-8 under 35 U.S.C. 101, as set forth in the previous Office Action (Paper No. 7 & 10 and Advisory Action), remains.

Application/Control Number: 09/775,181

Art Unit: 1646

Claims 1-8 are rejected under 35 U.S.C. § 101 because the claimed invention is not supported by either a credible, specific and substantial asserted utility or a well-established utility. The basis for this rejection is set forth in the previous Office Action (Paper No. 7 & 10 and Advisory Action).

Applicants argue that a knockout mouse has been made in which the mouse gene homologous to that represented by SEQ ID NOS: 1 and 2 was disrupted by homologous recombination and such disruption of the mouse gene resulted in an increase in mean cholesterol and triglyceride levels in the blood of male animals, providing evidence that the nucleic acid and protein of the present invention have a biological function and that antagonists directed at the molecule of the present invention can be used to lower blood cholesterol and triglyceride levels, which have been shown to directly lower the risk of heart attacks (2nd paragraph of page 3 of Applicants' response).

This has been fully considered but is not deemed to be persuasive for the following reasons. First, Applicants fail to submit the information and evidence related to the knockout mouse experiment that documents functions of the claimed nucleic acid and protein *in an appropriate form* in which the Examiner may be able to examine the validity of the information and data. Secondly, even if the information had been submitted in an appropriate form, the new evidence on the function of the nucleic acid and protein of the present invention would still have not been found to provide a patentable utility for the instantly claimed invention because there is no support for the

Application/Control Number: 09/775,181

Art Unit: 1646

"Control Number: 05/1/15, it

new information regarding the possible effect of the claimed nucleic acid and protein on

blood cholesterol and triglyceride levels. Nowhere in the specification discloses that the

nucleic acid and protein have any link with blood cholesterol and triglyceride levels.

Therefore, the applicants were not in possession of the utility at the time when the

application was filed.

Claim Rejections Under 35 U. S. C. § 112, 1st Paragraph

The rejection of claims 1-8 under 35 U.S.C. §112, 1st Paragraph, as set forth in the

previous Office Action (Paper No. 7 & 10 and Advisory Action), remains.

Claims 1-8 are rejected under 35 U. S. C. § 112, 1st paragraph. Specifically, since the

claimed invention is not supported by either a specific, substantial, and credible utility,

or a well-established utility, one skilled in the art clearly would not know how to use the

claimed invention. The basis for this rejection is set forth in the previous Office Action

(Paper No. 7 & 10; Advisory Action).

The applicants' arguments about the patentable utility of the claimed invention has been

fully considered but is not deemed to be persuasive for the reasons set forth above.

Conclusion

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Ruixiang Li whose telephone number is (703) 306-0282.

The examiner can normally be reached on Monday-Friday, 8:30 am-5:00 pm. If

attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Yvonne Eyler, can be reached on (703) 308-6564. The fax phone number

for this Group is (703) 305-3014 or (703) 308-4242.

Communications via Internet e-mail regarding this application, other than those under

35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and

should be addressed to [yvonne.eyler@uspto.gov]. All Internet e-mail communications

will be made of record in the application file. PTO employees do not engage in Internet

communications where there exists a possibility that sensitive information could be

identified or exchanged unless the record includes a properly signed express waiver of

the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the

Interim Internet Usage Policy published in the Official Gazette of the Patent and

Trademark on February 25, 1997 at 1195 OG 89. Any inquiry of a general nature or

relating to the status of this application or proceeding should be directed to the Group

receptionist whose telephone number is (703) 308-0196.
